SUMMARY

Results-driven QA Engineer with hands-on experience in functional, regression, API and exploratory testing across web and mobile platforms. Skilled at creating structured test cases, catching defects early and ensuring seamless performance across devices, working closely with engineering and product teams in Agile environments using tools such as Postman, Jira, Cypress and JMeter, with practical experience applying AI-powered workflows to accelerate test coverage, sharpen defect detection and streamline documentation. Known for exceptional attention to detail that consistently surfaces issues others overlook.

EDUCATION

University of Port Harcourt
B.Sc. Biochemistry (4.4/5)

SKILLS

- Test Case Design & Management
- Test Automation
- Functional Testing
- API Testing
- Bug Tracking and Reporting
- Understanding of SDLC
- Performance Testing
- Regression Testing
- Exploratory Testing
- AI Prompt Engineering
- Cross-Browser Testing
- Collaboration
- Communication

TOOLS USED

- VS Code
- Postman
- Cypress
- JMeter
- Git / GitHub
- Apollo Studio
- Jam.Dev
- Jira
- Loom
- Bugasura
- Microsoft Teams

CERTIFICATIONS

- Software Testing by Great Learning Academy
- Global Software Testers Summit & Bootcamp
- Software Testing Training from the Association of Nigerian Software Testers
- GSDC Global AI Testing
- ChatGPT Prompt Engineering for Developers
- Introduction to Responsible AI by Google Cloud
- Responsible AI Principles and Practices by Microsoft
- Elements of AI by University of Helsinki
- Prompt Engineering and Generative AI by Africa AI Hub
- AI-Driven Quality Engineering Certification by Testers Connect

PROFESSIONAL EXPERIENCE

Quality Assurance Engineer 06/26 - 08/26 Twikkie – An all-in-one platform for workforce management, collaboration, recruitment and business operations. • Created 3,000+ test cases, expanding test coverage and release confidence. • Championed AI-assisted QA practices, introducing tools and prompts that improved team testing workflows • Identified and documented 85+ high-impact defects through cross-browser and end-to-end testing across key application workflows.
Quality Assurance Engineer 03/26 - 05/26 Contract Afristakes - Connecting African entrepreneurs with the right investors • Conducted end-to-end testing of a dual-sided investment platform serving both SME and investor user flows • Identified and documented 35+ bugs spanning input validation, UI alignment, navigation, authentication and core platform functionality. • Discovered critical access control and session persistence vulnerabilities exposing sensitive business data to unauthenticated users and leaking credentials across account creation flows.
Quality Assurance Engineer 12/25 - 04/26 Contract Fraqvest - Making real estate investment accessible to everyone, one fraction at a time. • Uncovered critical security vulnerabilities including expired OTP acceptance, session bypass via URL manipulation and inadequate password policy enforcement. • Identified 60+ defects across security, validation, UI and transaction workflows. • Performed regression testing across sprint cycles, tracking fixes and recurring defects.
Community Operations Lead 05/25 - Present Testers Connect - Leading QA learning & knowledge-sharing community. • Managed and grew a QA community to 1.5k+ members, overseeing all operations, engagement and content strategy. • Organized webinars and led the "Testers' Ink" initiative, increasing knowledge sharing and community engagement. • Created data-driven content and campaigns, using feedback and metrics to optimize engagement and support members' learning and career growth.
Quality Auditor 04/25 - 06/25 International Testing & Training Services • Audited exam delivery processes to ensure compliance with LanguageCert testing standards • Reviewed test-centre readiness, documenting compliance gaps and corrective actions. • Identified gaps in readiness, providing structured recommendations that improved operational accuracy and test integrity across the centre.
Quality Assurance Engineer 01/25 - 12/25 Stardelite - Designs and builds digital products tailored to client needs. • Supported 4+ product launches, uncovering 25+ critical defects before release. • Executed 600+ test cases across new features and cross-platform user flows • Advocated for smoother QA workflows by improving communication between QA, developers and project managers through regular updates and status meetings.
Quality Assurance Engineer 6/24 - 10/24 Contract Paytton - Manages vendors, invoices and payments in one platform • Performed end-to-end testing on key app features, helping ensure a smooth user experience for 500+ users. • Created and executed 350+ test cases covering core application workflows. • Reported 40+ defects and validated fixes through regression testing.
